

**Washington Vaccine Association 2021-22 Vaccine Assessment Grid**  
**EFFECTIVE FOR ALL CLAIMS WITH A DATE OF SERVICE ON OR AFTER JULY 1, 2021.**

Please note that this WVA Assessment Grid, effective July 1, 2021, replaces the grid last updated on July 1, 2020. The grid lists vaccines and their corresponding CPT codes that are part of the dosage-based assessment (DBA) process for providers, health insurance carriers, and third party administrators. There are other childhood vaccines (and corresponding CPT codes) that are not included in the DBA process and, therefore, no assessment is needed. The availability of specific vaccine brands are determined by the manufacturer and not all brands of flu vaccine are offered through the Childhood Vaccine Program (CVP).

The pink column is the assessment amount per dose as of July 1, 2021.

To ensure proper DBA submission and carrier/TPA remittance to the WVA, please check the:

- Date of service to ensure the correct grid is being used;
- CPT code to ensure it is a valid code (\*see **note** below); and
- Assessment amount to ensure proper DBA submission and carrier/TPA remittance to the WVA.

\*Please note: Sometimes rendering providers can obtain vaccine material that is still viable and can administer it, even if it has been discontinued from prior grids and not showing on the current grid. If the CPT code is not offered on the current grid, providers should check the legacy information at the end of the grid document, and if a code was offered on a past WVA grid the last published assessment amount is what should be remitted to the WVA.
