

## Washington Vaccine Association Assessment Grid

**FOR ALL CLAIMS WITH A DATE OF SERVICE ON OR AFTER JULY 1, 2022.**

**For Dosage-Based Assessment (DBA) Billing Used for Commercially Insured Patients Under the Age of 19.**

Please note that this WVA Assessment Grid, effective July 1, 2022, replaces the grid last updated on July 1, 2021. The grid lists vaccines and their corresponding CPT codes that are part of the dosage-based assessment (DBA) process for providers, health insurance carriers, and third party administrators. There are other childhood vaccines (and corresponding CPT codes) that are not included in the DBA process and, therefore, no assessment is needed. The availability of specific vaccine brands are determined by the manufacturer and not all brands of flu vaccine are offered through the Childhood Vaccine Program (CVP). **The YELLOW COLUMN is the assessment amount per dose as of July 1, 2022.**

To ensure proper DBA submission and carrier/TPA remittance to the WVA, providers should check the:

- **Date of service** to ensure the correct Grid year is being used;
- **CPT code** to ensure it is a valid code (\*see **note** below); and
- **Assessment amount** to ensure proper DBA submission and carrier/TPA remittance to the WVA.

\*Please note: Sometimes vaccine material is still viable and can be administered, even if it has been discontinued from prior Grids and is not shown on the current Grid. If the CPT code is not offered on the current Grid, providers should check the legacy information at the end of the grid document to determine if a prior Grid amount should be billed on the DBA. Please validate the date of service and the legacy Grid year when selecting the Grid amount.
