

PROVIDER BULLETIN

WASHINGTON VACCINE ASSOCIATION

March 3, 2023

Dear Childhood Vaccine Program Participating Provider:

Effective March 1, 2023, a new presentation (new NDC) of the Rotarix® vaccine is available through the Washington State Childhood Vaccine Program and has been added to the [WVA's Vaccine Assessment Grid](#). See the NDC coding change below. This new vaccine is found on page 2 of the [WVA Vaccine Assessment Grid](#) and is available for ordering via the IIS ordering system.

Effective March 1, 2023, this vaccine should be billed to commercial insurance payers and third-party administrators using the WVA's dosage-based assessment (DBA) process for patients under the age of 19. **As a provider, you will need to update your billing system to include this NDC code when submitting DBAs. The CPT Code and WVA Assessment Amount remain the same. Your office may still have supply of the older NDC code for a period of time which will require the older NDC code when submitting the DBA.**

Effective March 1, 2023, the following vaccine has been added to the WVA's Vaccine Assessment Grid:

NAME	PURPOSE	CVC CODE	CPT CODE	NDC CODE/ PACKAGING	WVA ASSESSMENT AMOUNT
Rotarix®	RV1	119	90681	58160-0740-21 (10 pack – 1 oral dose)	\$97.88

For more information regarding the DBA process for providers, please see the [WVA Private Insurance Assessment Billing Provider Guide](#), the WVA website www.wavaccine.org, or send an email to info@wavaccine.org.

Thank you for your continued support of the WVA.

Best regards,

Julia Zell, Esq.
Executive Director

**Update your
billing system!**
