

▶ BILLING UPDATE WVA WASHINGTON VACCINE ASSOCIATION

November 1, 2023

Dear WVA Payer:

Effective **January 1, 2024**, two new vaccines are planned to be added to the WVA's [Vaccine Assessment Grid](#):

- **ABRYSVO™** respiratory syncytial virus (RSV) for pregnant persons under the age of 19; and
- **PENBRAYA™** ABCWY meningococcal B for children aged 10 through 18.

Once available to providers in 2024, these vaccines will be billed to commercial insurance payers and third-party administrators (TPAs) using the WVA's dosage-based assessment (DBA) process for patients under the age of 19. **As a payer, your adjudication systems will need to be updated as soon as the corresponding CPT codes, NDC codes, and WVA assessment amounts are available. The WVA will send you a subsequent notice and an updated [Vaccine Assessment Grid](#) at that time.**

For more information regarding the DBA process, please see the [WVA Health Insurer and TPA Compliance Guide](#), wavaccine.org, or email us at compliance@wavaccine.org.

Best regards,

Julia Walter Zell, MA, Esq., Executive Director
