

2026 Respiratory Vaccine Assessment Grid Changes

September 28, 2026

To: Washington Vaccine Association Health Insurers and Third-Party Administrators,

This notice includes important respiratory vaccine updates for influenza, COVID-19, and RSV. The following changes are noted in the table below, please update your billing system immediately. The **2026-27 Vaccine Assessment Grid** ("Grid") is in **effect between July 1, 2026 and June 30, 2027**, and is posted to the WVA's website (wavaccine.org) in both PDF and Excel format.

PRODUCT	NEW NDCs	NEW GRID AMOUNTS (\$)
INFLUENZA	All Vaccines	Flucelvax [®] TIV Only
COVID-19	All Vaccines	All Vaccines
RSV	ABRYSVO [™] Only	No Changes

The **2026-27 Vaccine Assessment Grid** lists the Childhood Vaccine Program immunizations along with their associated CPT code, NDC, and assessment fee and serves as a fee schedule for the required, separately billed dosage-based assessment ("DBA") submitted under the WVA's TIN. The DBA requirement applies to healthcare providers, insurance companies, and third-party administrators ("TPAs"). The updated Grid can be found online (wavaccine.org) and on the backside of this notice. Please take a moment to review both sides of this document and share as appropriate within your organization.

As a reminder:

- Providers are **required to submit the DBA** to health insurance carriers and TPAs **with the correct Grid Amount** based upon date of service.
- Health insurance carriers and TPAs are **required to remit the full Grid Amount to the WVA** per RCW 70.290.040.
- Health insurance carriers and TPAs **should not process DBAs as Out-of-Network** services.
- Any **logic to pay at lesser-of billed versus charges** should be **turned off** for the WVA TIN.
- **Timely filing limits do not apply** to DBA payments.

The updated Grid changes are included on the backside of this notice. Please review both sides and update your systems immediately. Should you have any questions, please contact us at info@wavaccine.org.

Best regards,

Executive Director
