

2026 Respiratory Vaccine Assessment Grid Changes

September 28, 2026

Dear Childhood Vaccine Program (“CVP”) Provider:

This notice includes important respiratory vaccine updates for influenza, COVID-19, and RSV. The following changes are noted in the table below, please update your billing system immediately. The **2026-27 Vaccine Assessment Grid** (“Grid”) is in effect **between July 1, 2026 and June 30, 2027**, and is posted to the WVA’s website (wavaccine.org) in both PDF and Excel format.

PRODUCT	NEW NDCs	NEW GRID AMOUNTS (\$)
INFLUENZA	All Vaccines	Flucelvax® TIV Only
COVID-19	All Vaccines	All Vaccines
RSV	ABRYSCO™ Only	No Changes

The **2026-27 Vaccine Assessment Grid** lists the CVP immunizations along with their associated CPT code, NDC, and assessment fee and **serves as a fee schedule** for the required, separately billed dosage-based assessment (“DBA”) submitted under the WVA’s TIN. The DBA requirement applies to healthcare providers, insurance companies, and third-party administrators (“TPAs”). The Grid can be found online at: wavaccine.org.

As a reminder:

- Providers are **required to submit the DBA** to health insurance carriers and TPAs **with the correct Grid Amount** based upon date of service.
- When billing the DBA, providers are required to **verify patient vaccine eligibility** using the **WA DOH Eligibility Grid**, as well as verifying the patient’s current insurance coverage.
- Properly submitted **DBAs ensure that adequate funds are available** to support the state’s continued purchase of pediatric immunizations for Washington children under age 19.

The updated Grid changes are included on the backside of this notice. Please review both sides and update your systems immediately. Should you have any questions, please contact us at info@wavaccine.org.

Best regards,

Julia Watten Zell

Executive Director
